

# NATIVE PLANTS FOR ACREAGE & LANDOWNERS

## CONSERVATION

Take environmental action into your own hands, by creating biodiversity on your property with the use of native plants.

## WINDBREAKS

Protect your acreage or property from both the cold winter and hot summer winds, as well as blowing snow and dust.

## WILDLIFE HABITAT

Use native plants to create a food source and safe haven that your local birds, butterflies and wildlife will thank you for.

### CONSULT & DESIGN

Our team consults on project goals, determines proper trees, designs, and creates a project timeline.

### DELIVERY

Deliveries direct to your site, when **you** are ready.

### VISIT THE NURSERY

Visualize native trees and shrubs on your property with a walk through our gardens and nursery.

### PLANTING

Our knowledgeable staff is highly trained in proper tree planting technique and can complete your project in full.

### CONTINUED CARE

Consistent waterings the first year after planting are key for successful establishment. We offer watering contracts or are available on an as-need basis to ensure survivability. Additional annual services include pruning, fertilizing and mulching.

### EDUCATION

Our team of horticulturists educate, guide and enable you for long-term success with your new acreage and windbreak plantings.
